Case management or care coordination plays a pivotal role when seniors face health challenges or need to navigate options.

Join us for learning and discussion. We'll tackle questions including:

- What will be the effect of recent radical changes to Targeted Case Management?
- To what extent does care coordination happen inside of Medi-Cal Managed Care?
- Which individual CBOs have taken on navigation and coordination roles, and is it working?
- What is available and how is it accessed?

If you have a topic or question to add to this convening, please share it by [emailing Wendy](#) at the Senior Services Coalition.
